J&R TECHNOLOGY

JR-TH-03 TELEPHONE BOOTH

JR-TH-03 is designed for noisy internal or external installations, providing a weatherproof and quieter telephone area.
Manufactured in robust galvanised metal. Internally the three sides of the booth are pre-lined with 50mm non-combustible, non-hygroscopic acoustic insulation. This is held in place by galvanised perforated panels. An acoustic slab is place inside the roof cavity for further insulation. And telephone will be fitted to the inner back panel of the booth.
Two vandal-proof windows allow a natural light source. And the telephone booth with fancy looking and inside lamp will provide a quiet and safety communication environment day and night.
