

This Impact Punch down Termination Tool from Nexxt Solutions is the tool of choice for the professional installer. This versatile tool provides a new level of performance for seating, cutting and terminating connectors in a variety of cross-connect panels, blocks and keystone jacks. Easily remove wires and modules with the hook and spudger tools that are built into the handle. Its spring-loaded twist-and -lock mechanism with adjustable impact settings of the blade enables optimal pressure selection for precise and clean wire terminations. This tool features a rugged frame with an ergonomically designed handle that significantly reduces hand fatigue. Blade storage area in end of tool with convenient latch cover.

AW250NXT11

FEATURES

- Selectable, spring compression (high/low) mechanism requires less hand force to actuate.
- Built-in hook and spudger tools.
- Reversible steel blade: one end terminates and cuts off excess wire; the other end terminates without cutting.
- For "110" and optional "88" terminations.
- Lifetime warranty.

INSTRUCTIONS

1. Remove the terminal block from the metal base.
 - a. Insert the unlocking blade into the metal base.
 - b. Push the terminal block out.
2. Use the wire hook to hook the wire out from the terminal block.
3. Place the wire correctly into the terminal block.
 - a. Place the wire correctly into the terminal block.
 - b. Insert the punch down head into the terminal block, carefully align over the index strip and punch down the block until a click sound is heard; thus completing the operation.
4. With storage on the top of the tool.
